DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art of record teaches preventing capture of a workstation by implementing an encryption device running on the workstation. A button to zero-out the key in the smart card is provided in case of hostile overrun (Non-Patent Literature to Mallett). Bergum, in US Patent 5,457,748, teaches using volatile and non-volatile storage devices in storage of encryption keys and a power sensing circuit to help in active erasure of keys from the volatile memory in the event of a non-secure operative condition. The arguments presented by applicant in the response filed on 2/3/2005 are persuasive. As stated by applicant Mallet does not teach the transporting of the target portable computing device and media device to a location physically distant from the mission planning workstation and deleting said encryption key from said media device in response to said transport step as claimed in claim 1. Claim 12 further recites a mission planning workstation connected to a least one media device during loading and encryption of sensitive data and loading of unencrypted benign data wherein the encryption key is loaded into the at least one media device and erased from said at least one media device after commencement of the mission; the encryption key is resident only in volatile memory on any media device connected to the target portable computing device after mission commencement... The steps are not taught by neither Mallett nor Brgum. The prior art of record taken alone or in combination fail to teach, anticipate, suggest, or render obvious the claimed invention. Consequently, independent claims 1 and 12 are allowable over the prior art of record. Claims 3-9 and 11 are directly or

indirectly dependent upon claim 1 and therefore are also allowable over the prior art of record. Claim 13 is directly or indirectly dependent upon claim 12 and therefore is allowable over the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
